

## TABLE OF CONTENTS

<b>Preface</b>	
ALEC A. PRIDGEON .....	III
<b>Acknowledgments</b> .....	IV
<b>Darwin's orchids: their variation, plasticity, and natural selection</b>	
JAMES D. ACKERMAN, MARIELY MORALES & RAYMOND TREMBLAY .....	179
<b>How many orchid species in Costa Rica? A review of the latest discoveries</b>	
DIEGO BOGARÍN .....	185
<b>Mating systems in the Pleurothallidinae (Orchidaceae): evolutionary and systematic implications</b>	
EDUARDO LEITE BORBA, ARIANE RAQUEL BARBOSA, MARCOS CABRAL DE MELO, SAMUEL LOUREIRO GONTIJO & HENRIQUE ORNELLAS DE OLIVEIRA .....	207
<b>A look at "The orchid book" in celebration of Charles Darwin's 200th birthday</b>	
KENNETH M. CAMERON .....	223
<b>Orchids in a changing climate</b>	
PHILLIP CRIBB .....	233
<b>¿Las Sobralias se pueden clasificar? — El complejo de <i>Sobralia warszewiczii</i></b>	
ROBERT L. DRESSLER .....	239
<b>Filogenia molecular preliminar de <i>Scaphosepalum</i> (Orchidaceae: Pleurothallidinae)</b>	
LORENA ENDARA A., NORRIS H. WILLIAMS & W. MARK WHITTEN .....	245
<b>The genus <i>Coryanthes</i>: a paradigm in ecology</b>	
GÜNTER GERLACH .....	253
<b>What will be left of the primary forest in Ecuador?</b>	
ALEXANDER HIRTZ .....	265
<b>How uniform is species diversity in tropical forests?</b>	
PAVEL KINDLMANN & CARLOS A. VERGARA CASSAS .....	269
<b>Active mountain building and the distribution of "core" Maxillariinae species in tropical Mexico and Central America</b>	
STEPHEN H. KIRBY .....	275
<b>The role of common orchids in appreciating the complexity of biodiversity conservation</b>	
MARILYN H. S. LIGHT & MICHAEL MACCONAILL .....	293
<b>Botanic gardens, education, and orchid conservation strategies: the need for a coordinated approach</b>	
THOMAS J. MIRENDA .....	301
<b>Preliminary molecular phylogenetics of <i>Sobralia</i> and relatives (Orchidaceae: Sobralieae)</b>	
KURT M. NEUBIG, W. MARK WHITTEN, MARIO A. BLANCO, LORENA ENDARA, NORRIS H. WILLIAMS & SAMANTHA KOEHLER .....	307
<b>Epigenetic information – Unexplored source of natural variation</b>	
OVIDIU PAUN & MARK W. CHASE .....	319

<b>Of greenish <i>Encyclia</i>: natural variation, taxonomy, cleistogamy, and a comment on DNA barcoding</b>	
FRANCO PUPULIN & DIEGO BOGARÍN .....	325
<b>The leaves got right again: DNA phylogenetics supports a sister-group relationship between <i>Eurystyles</i> and <i>Lankesterella</i> (Orchidaceae: Spiranthinae)</b>	
GERARDO A. SALAZAR & ROBERT L. DRESSLER .....	337
<b>Orchid seed stores for sustainable use: a model for future seed-banking activities</b>	
PHILIP T. SEATON & HUGH W. PRITCHARD .....	349
<b>Fitness landscapes in orchids: parametric and non-parametric approaches</b>	
RAYMOND L. TREMBLAY .....	355
POSTERS	
<i>Conservation science</i>	
<b>Aplicación de la técnica de encapsulación – deshidratación para la crioconservación de semillas y protocormos de <i>Oncidium stenotis</i> (Orchidaceae)</b>	
ALBERTO ROURA, KARINA PROAÑO & MÓNICA JADÁN .....	365
<i>Ecology</i>	
<b>Mating system and female reproductive success of the endemic, epiphytic <i>Prosthechea</i> aff. <i>karwinskii</i> (Orchidaceae)</b>	
ERIKA CAMACHO-DOMÍNGUEZ & IRENE ÁVILA-DÍAZ .....	366
<b>Hongos endófitos de la orquídea epífita <i>Laelia speciosa</i></b>	
ROBERTO GARIBAY-ORIJEL, KEN OYAMA & IRENE ÁVILA-DÍAZ .....	367
<b>Evidence of protandry in <i>Aa</i> Rchb.f. (Orchidaceae, Cranichideae)</b>	
DELSY TRUJILLO, THASSILO FRANKE & REINHARD AGERER .....	368
<i>Systematics</i>	
<b>A phylogenetic analysis of the genus <i>Pleurothallis</i>, with emphasis on <i>Pleurothallis</i> subsection <i>Macrophyllae-Fasciculatae</i>, using nuclear ITS and chloroplast DNA sequencing</b>	
M. WILSON, C. BELLE, A. DANG, P. HANNAN, C. KENYON, H. LOW, T. STAYTON & M. WOOLLEY .....	369
<b>Phylogenetic analysis of the Andean genus <i>Brachycladium</i> Luer (syn. <i>Oreophilus</i> Higgins &amp; Archila) and closely related genera based on nuclear ITS sequencing</b>	
MARK WILSON & LOU JOST .....	370
<b>Barcoding the species of <i>Pleurothallis</i> subsection <i>Macrophyllae-Fasciculatae</i></b>	
MARK WILSON .....	371
